Summer 2025 Fellowship

ABOUT

We're empowering the next generation of mission-driven technologists by creating new pathways into public interest technology.
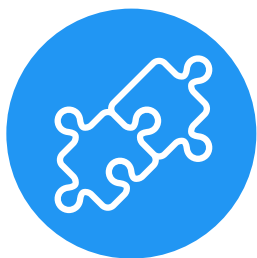

Fellows spend the summer working on high-impact projects in cybersecurity, data, design, product management, or software engineering to deliver policy, improve systems, and strengthen products on behalf of the American people.

WHAT WE DO

Full-Service Recruiting

Our team recruits and reviews thousands of candidates each year to save your team time and resources. We ensure our candidates meet our standards for technical excellence and mission-driven alignment so you don't have to.

Host Office Placement

We'll support you in creating projects for Fellows that match your goals. Then, we'll refer top candidates to your team to interview before choosing your Fellow(s).

Professional Development

Your team will supervise your Fellow(s) while we guide them through programming designed for early-career technologists. Activities include mentorship, weekly speaker events, regular check-ins with our team, and more.

BY THE NUMBERS

$25,000 PER FELLOW

is the cost for hosting a Fellow, which covers the Fellow's salary and Coding it Forward's program costs.

10 WEEKS

is the length of the Fellowship, which runs from June 9th to August 15th, 2025.

80+ HOST OFFICES

we've worked with since 2017, including 14 federal agencies, 5 state governments, and nearly 50 offices in 6 states, 4 counties, and 16 cities.

4,400+ APPLICANTS

applied for 2024. Applicants are bootcamp, undergraduate, and graduate students that represent nearly 600 educational institutions and all 50 states. They're also majority female and people of color.

700 ALUMNI

who have completed the Fellowship since 2017. Over 50% of them now work in public service or social impact roles.
