Manifold Workshops

Welcome! We are excited to announce our workshops and events for the fall semester. Think academic work is creative? We agree! Manifold can help support your next project.

With Manifold you can:

- Create and share your own scholarly works.
- Craft custom classroom versions of texts and textbooks that are openly licensed or in the public domain.
- Develop Open Educational Resources (OER).
- Publish journals, dissertations, and more!
- Build your own course reader using materials readily available in our Manifold instance through Manifold Reading Groups.

Office Hour/Open Studio Schedule

Our office hour is every Tuesday from 12:00pm EST to 1:00pm EST. Come to ask us questions and brainstorm ideas, and we will try our best to provide the support you need for your project.

Every other week, we will hold an "Open Studio" session to help you build out one 'block' (or section) of your Manifold project. These low-stake, step-by-step workshops serve as a gentle introduction to Manifold platform. The dates for "Open Studio" sessions are **Oct. 17, Oct. 31, Nov. 14, Nov. 28, Dec. 5.**

Manifold Workshops

Stay tuned for upcoming Manifold workshops! We will introduce the latest version of Manifold v8.0.0.
